Store Visit Activity Template Guide

Review copy generated from the current live template definitions in lib/visit-needs.ts.

Generated on 2026-04-02 with 19 activity templates.

Included Templates

- Checked banking `[checked_banking]`
- Till checks `[completed_till_checks]`
- Line checks `[completed_line_checks]`
- Internal theft interview `[internal_theft_interview]`
- Internal theft confirmed on CCTV `[internal_theft_cctv_confirmed]`
- Interview plan - staff theft `[staff_theft_interview_plan]`
- Red stock count investigation `[red_stock_count_investigation]`
- Investigation work `[supported_investigation]`
- CCTV / alarm review `[reviewed_cctv_or_alarm]`
- Loss controls review `[reviewed_loss_controls]`
- Opening checks `[conducted_opening_checks]`
- Stop on close `[conducted_stop_on_close]`
- Statements / interviews `[took_statements_or_interviews]`
- Paperwork / process review `[reviewed_paperwork_or_processes]`
- Stock loss / counts `[reviewed_stock_loss_or_counts]`
- Delivery / parcel issue `[checked_delivery_or_parcel_issue]`
- Security procedure review `[reviewed_security_procedures]`
- Store support / training `[provided_store_support_or_training]`
- Other `[other]`

Checked banking

Verified banking paperwork, cash handling, or deposit controls.

Template key	`checked_banking`
Form variant	cash-check
Evidence label	Banking document
Specialist	No
Detail placeholder	Summarise the banking checks completed, paperwork reviewed, and any discrepancies found.

What Checked

Banking Review Script

Use this when walking through the banking paperwork and physical cash handling.

- "Which banking reference, bag, deposit, or safe amount are we checking?"
- "Talk me through the normal banking process, who handled it, and which records support it."
- "What bags, slips, logs, or safe contents did we physically compare today?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Banking reference `[bankingReference]`

Input: text | Section: What Checked

Field prompt: Deposit number, bag reference, banking slip...

Capture: Record the deposit number, bag reference, or banking identifier used for the review.

Script questions

- "Which deposit, bag, or banking reference are we reviewing?"

Reviewed with `[reviewCompletedWith]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, cash office colleague...

Capture: List the colleague or manager who reviewed the banking with you.

Script questions

- "Who completed the banking review with you and who normally owns the process?"

Banking items checked `[bankingItemsChecked]`

Input: textarea | Section: What Checked

Field prompt: List the bags, envelopes, safe contents, or deposits reviewed.

Capture: List the cash items or banking units that were checked during the review.

Script questions

- "Which bags, envelopes, safe contents, or deposits did we physically check?"

Paperwork reviewed `[paperworkReviewed]`

Input: textarea | Section: What Checked

Field prompt: Banking sheet, handover log, pay-in slips, safe records...

Capture: Record the paperwork and records used to confirm the banking position.

Script questions

- "Which slips, logs, or banking records did we compare against the physical cash?"

Findings

Banking Findings Script

Use this section to pin down the discrepancy and the control failure behind it.

- "What does the expected banking position show compared with what was found?"
- "Is this a shortage, overage, paperwork gap, late banking, or bag mismatch?"
- "What control weakness or handover failure allowed the issue to happen?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Discrepancy / irregularity found `[discrepancyType]`

Input: textarea | Section: Findings

Field prompt: Missing slip, short banking, bag mismatch, late banking, paperwork gap...

Capture: Summarise the issue found, such as a shortage, overage, missing slip, mismatch, or delay.

Script questions

- "What discrepancy, irregularity, or control gap did the banking review identify?"

Actions

Banking Action Script

Use this before closing so the cash issue and next ownership are clear.

- "What was secured, recounted, corrected, or contained before leaving site?"
- "Who was updated about the banking issue?"
- "Who owns the follow-up and by when?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Discrepancy notes / action taken `[discrepancyAction]`

Input: textarea | Section: Actions

Field prompt: Record any shortfall, overage, missing paperwork, or action taken on site.

Capture: Capture the immediate action taken on the banking issue or shortfall.

Script questions

- "What did you do about the discrepancy before leaving site?"

Amount Check Prompts

Banking Amount Prompts

Use each row to record the expected versus actual banking figure and any gap.

- "Which banking bag, safe amount, or deposit figure does this row represent?"
- "What should the amount have been and what was physically found?"
- "How is any shortage, overage, or mismatch being explained or escalated?"

Till checks

Checked tills, till balances, or cash handling controls.

Template key	`completed_till_checks`
Form variant	cash-check
Evidence label	Till document
Specialist	No
Detail placeholder	Record which tills were checked, any variances found, and what was actioned on site.

What Checked

Till Check Script

Use this while checking tills, floats, and shift controls with the store team.

- "Which tills, floats, or terminals are we checking and for what shift or period?"
- "Who completed the review with you and who normally controls these tills?"
- "What till-control steps, paperwork, or cash-handling routines were tested?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Tills checked `[tillsChecked]`

Input: textarea | Section: What Checked

Field prompt: List the tills, floats, or terminals reviewed.

Capture: List the tills, floats, or terminals included in the visit.

Script questions

- "Which tills, floats, or terminals were checked?"

Reviewed with `[reviewCompletedWith]`

Input: text | Section: What Checked

Field prompt: Manager, supervisor, cash office colleague...

Capture: Name the manager, supervisor, or colleague involved in the till review.

Script questions

- "Who completed the till check with you and who controls the tills on that shift?"

Cash controls reviewed `[cashControlsReviewed]`

Input: textarea | Section: What Checked

Field prompt: Describe the till processes or controls checked during the visit.

Capture: Describe the cash controls or till processes reviewed during the check.

Script questions

- "What till-control steps, cash routines, or paperwork checks were tested?"

Period / shift checked `[spotCheckWindow]`

Input: text | Section: What Checked

Field prompt: Opening, mid-day, close, shift handover, float set-up...

Capture: Record the shift or period linked to the till review.

Script questions

- "What shift, handover, or time window does this till check cover?"

Findings

Till Findings Script

Use this section to capture patterns in the cash result and what they suggest.

- "What mismatch, variance pattern, or refund concern did the till check show?"
- "Is this isolated or part of a repeat issue?"
- "What weakness in till process, training, or supervision explains it?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Variance pattern / concern `[variancePattern]`

Input: textarea | Section: Findings

Field prompt: Repeat till mismatch, poor paperwork, training issue, refund risk, keying error...

Capture: Summarise the main variance concern or repeat pattern found in the till check.

Script questions

- "What variance pattern, refund concern, or till behaviour did the check show?"

Actions

Till Action Script

Use this to record what was corrected, escalated, or handed over after the check.

- "What was recounted, corrected, coached, or secured before you finished?"
- "Who was told about the till outcome?"
- "What follow-up action is still required and who owns it?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Variance / action taken `[varianceAction]`

Input: textarea | Section: Actions

Field prompt: Record mismatches found and what was done on site.

Capture: Record the action taken on site in response to the till finding.

Script questions

- "What was corrected, escalated, or coached after the till result was found?"

Amount Check Prompts

Till Amount Prompts

Use each row to compare the till or float expectation against the counted result.

- "Which till, float, or cash point does this row relate to?"
- "What was the expected amount and what was actually counted?"
- "What explains any mismatch and what action followed?"

Line checks

Reviewed line checks, spot checks, or customer-facing controls.

Template key	`completed_line_checks`
Form variant	line-check
Evidence label	Line-check evidence
Specialist	No
Detail placeholder	Capture which line checks were reviewed and any compliance gaps or coaching given.

What Checked

Line Check Script

Use this while walking the sales floor or stock area and recording what was counted.

- "Which brands, fixtures, bays, or stock lines are we checking?"
- "Which areas were reviewed and what count source or method are we using?"
- "Which high-risk products were prioritised during the check?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Lines / ranges checked `[linesChecked]`

Input: textarea | Section: What Checked

Field prompt: Which brands, bays, cabinets, drawers, or high-risk ranges were checked?

Capture: List the main stock lines or ranges reviewed.

Script questions

- "Which brands, ranges, bays, or lines were counted?"

Areas checked `[areasChecked]`

Input: textarea | Section: What Checked

Field prompt: Sales floor, stockroom, till point, fragrance wall, promo table...

Capture: Record the physical areas included in the check.

Script questions

- "Which store areas or fixtures were covered by the line check?"

Count method / stock source used `[countMethod]`

Input: textarea | Section: What Checked

Field prompt: Stock system, report, blind count, re-count, manual spot check...

Capture: Note the system, report, blind count, or manual count method used.

Script questions

- "What count source, report, or method are we using for this check?"

High-risk products checked `[highRiskProductsChecked]`

Input: textarea | Section: What Checked

Field prompt: List the key fragrances or stock lines prioritised during the check.

Capture: List the high-risk products or lines that were specifically checked.

Script questions

- "Which high-risk products or fragrances were prioritised?"

Findings

Line Check Findings Script

Use this to capture the stock result and any control weakness it exposed.

- "What missing, extra, damaged, or unexplained stock did the line check show?"
- "Which product lines carry the greatest loss risk from this result?"
- "What process or control weakness might explain the variance?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Actions

Line Check Action Script

Use this before closing so recounts, coaching, and ownership are explicit.

- "What was re-counted, secured, corrected, or highlighted before leaving site?"
- "Who was updated about the line-check result?"
- "Who owns the follow-up actions and by when?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Counted Item Prompts

Line Count Prompts

Use each row to record what was counted and challenge any variance clearly.

- "Which exact product or line are we checking here?"
- "What should the stock position be, and what was physically counted?"
- "How do we explain any missing, extra, or damaged units on this row?"

Internal theft interview

Specialist interview template for suspected employee cash or stock theft, including evidence prompts, cash discrepancies, and fragrance line checks.

Template key	`internal_theft_interview`
Form variant	internal-theft
Evidence label	Interview evidence
Specialist	Yes
Detail placeholder	Capture who was interviewed, the allegation explored, the evidence discussed, and what was admitted, denied, or contradicted.

What Checked

Opening Interview Script

Use this flow while opening the meeting and putting the allegation.

- "This meeting is to discuss concerns about [loss / transaction / stock issue] linked to [dates / shifts]."
- "For the record, confirm who is present, the subject's role, and whether any representative or witness is attending."
- "I am going to put the information we have to you and ask for your explanation of the cash, stock, access, and evidence in scope."

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Case / HR reference `[caseReference]`

Input: text | Section: What Checked

Field prompt: Investigation, HR, ER, incident, or case reference linked to the interview.

Capture: Enter the investigation, HR, ER, incident, or case reference used during the meeting.

Script questions

- "For the record, this interview relates to case / HR reference..."

Interview subject / role `[interviewSubject]`

Input: text | Section: What Checked

Field prompt: Who was interviewed, what is their role, and what access or responsibility do they hold?

Capture: Record the subject, their role, and any relevant access, till use, keyholding, or stock responsibility.

Script questions

- "Please confirm your full name, role, and normal responsibilities / access in store."

Allegation / reason for interview `[allegationSummary]`

Input: textarea | Section: What Checked

Field prompt: What suspected internal theft, cash loss, stock loss, refund abuse, void abuse, or dishonesty issue was put to them?

Capture: Write the allegation clearly enough that another manager can see exactly what was put to the subject.

Script questions

- "The concern being put to you is..."

Dates / shifts / transactions in scope `[datesOrShiftsInScope]`

Input: textarea | Section: What Checked

Field prompt: Which dates, shifts, deposits, tills, stock counts, deliveries, or transactions were discussed?

Capture: List the exact dates, shifts, transaction references, till IDs, or count windows covered in the interview.

Script questions

- "We are discussing the following dates, shifts, transactions, tills, counts, or deposits..."

Interview setting / people present `[interviewSetting]`

Input: textarea | Section: What Checked

Field prompt: Where was the interview held, who was present, and was any representative or witness involved?

Capture: Record the room/location, attendees, and whether a representative, witness, or note taker was present.

Script questions

- "Confirm where this interview is taking place and whether anyone is accompanying or witnessing it."

Cash handling questions asked `[cashQuestionsAsked]`

Input: textarea | Section: What Checked

Field prompt: Ask about till access, safe keys, banking, refunds, voids, handovers, shortages, overages, and any explanation for discrepancies.

Capture: Record the actual cash-handling questions you asked so the report shows how the subject was challenged.

Script questions

- "Talk me through your normal till, safe, refund, void, and banking responsibilities."
- "Who else had access, who verified the cash, and what happened on the shift in question?"
- "How do you explain any shortage, overage, missing bag, refund pattern, or paperwork gap?"

Stock handling / line check questions asked `[stockQuestionsAsked]`

Input: textarea | Section: What Checked

Field prompt: Ask about fragrance handling, deliveries, counts, adjustments, testers, damaged stock, stockroom access, and missing lines identified on line checks.

Capture: Record the stock, line-check, and handling questions you put to the subject.

Script questions

- "Talk me through your handling of deliveries, counts, adjustments, damages, testers, and stockroom access."
- "Who last handled the missing lines, and how would you explain any stock difference?"

Access / opportunity explored `[accessOrOpportunityExplored]`

Input: textarea | Section: What Checked

Field prompt: What keys, logins, till IDs, stockroom access, or unattended process gaps could have given the subject opportunity?

Capture: Capture the access points, opportunity windows, and process gaps discussed.

Script questions

- "What keys, codes, logins, till IDs, stockroom areas, or process gaps could you access?"
- "When were you able to act without challenge or supervision?"

Findings

Account And Challenge Script

Use this section to capture the subject's account and compare it against the evidence. Record material wording verbatim where it matters, separate fact from inference, and avoid opinion.

- "Talk me through what happened from your point of view, step by step."
- "Help me understand any difference between your account and the CCTV, till, banking, or stock evidence."
- "Is there anyone else involved, or any process weakness that explains what we are seeing?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Subject account / explanation `[interviewAccountSummary]`

Input: textarea | Section: Findings

Field prompt: Summarise the account given in interview and any explanation offered for the loss, variance, or suspicious activity.

Capture: Write the subject's account in a fair, chronological summary, using their wording where it matters.

Script questions

- "In your own words, talk me through what happened from your point of view."

Admission, denial, or inconsistency `[admissionOrInconsistency]`

Input: textarea | Section: Findings

Field prompt: What was admitted, denied, changed, contradicted, or left unexplained during the interview?

Capture: Record the key admission, denial, inconsistency, change of account, or unanswered point.

Script questions

- "Is there anything you admit, dispute, need to correct, or cannot explain?"

Evidence corroborated / contradicted `[evidenceMatchOrConflict]`

Input: textarea | Section: Findings

Field prompt: Which CCTV, till records, cash paperwork, stock counts, line checks, or witness evidence supported or conflicted with the account?

Capture: Link the subject's account to the evidence that supported it or contradicted it.

Script questions

- "Which parts of the CCTV, till, banking, or stock evidence do you accept, and which do you dispute?"

Other people named / implicated `[otherPersonsNamed]`

Input: textarea | Section: Findings

Field prompt: Did the subject identify any other staff, managers, witnesses, or process owners relevant to the theft or control failure?

Capture: List any other people named, their role, and why they are relevant.

Script questions

- "Is anyone else involved, aware, responsible for the process, or able to explain part of this issue?"

Actions

Close And Escalation Script

Use this before ending the interview so the report clearly records the next steps.

- "What needs securing immediately before anyone leaves: cash, stock, keys, logins, CCTV, paperwork, or statements?"
- "Who else needs to be updated or interviewed after this meeting?"
- "The immediate next steps after this interview are..."

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Evidence retained `[evidenceRetained]`

Input: textarea | Section: Actions

Field prompt: What evidence was retained, preserved, exported, or requested?

Capture: Record the evidence that was formally retained or preserved.

Script questions

- "What evidence was retained, preserved, exported, or requested as part of this activity?"

Where evidence is stored `[evidenceStoredAt]`

Input: text | Section: Actions

Field prompt: Shared drive, case folder, system, locker, safe, email chain, police portal...

Capture: State where the evidence is stored so it can be located later.

Script questions

- "Where is the retained evidence now stored?"

Who holds evidence now `[evidenceHeldBy]`

Input: text | Section: Actions

Field prompt: LP officer, store manager, HR, police, courier claims team...

Capture: Name the person or team currently holding the evidence.

Script questions

- "Who currently holds or controls that evidence?"

External involvement `[externalInvolvement]`

Input: text | Section: Actions

Field prompt: Police, HR, insurer, courier claim, supplier claim, contractor ticket, none...

Capture: Record any external party or formal process now involved.

Script questions

- "Is any external party or formal process involved in this case?"

External reference number `[externalReference]`

Input: text | Section: Actions

Field prompt: Police CAD, HR case, insurer claim, courier claim, contractor ticket...

Capture: Record the linked external reference if one exists.

Script questions

- "What external reference number or case number is linked to that involvement?"

Evidence preserved / requested `[evidencePreserved]`

Input: textarea | Section: Actions

Field prompt: What CCTV, till logs, banking sheets, line-check outputs, stock reports, statements, or device records were secured or requested?

Capture: List the exact evidence preserved, requested, or handed over after the meeting.

Script questions

- "What evidence has been secured already, and what still needs pulling or preserving?"

Disciplinary / HR / police escalation `[disciplinaryOrPoliceEscalation]`

Input: textarea | Section: Actions

Field prompt: Record any HR, ER, management, investigations, or police escalation agreed after the interview.

Capture: Record the escalation path agreed after the interview and who was tasked to take it forward.

Script questions

- "Does this now require HR, ER, disciplinary, investigations, or police referral, and who makes that decision?"

Recovery / further checks required `[recoveryOrFurtherChecks]`

Input: textarea | Section: Actions

Field prompt: What further cash reconciliation, stock recount, fragrance line checks, statement taking, suspension, recovery, or follow-up interview is required?

Capture: List the remaining checks, recovery work, and follow-up actions that still need to happen.

Script questions

- "What further reconciliations, recounts, statements, recovery steps, or follow-up interviews are still required?"

Counted Item Prompts

Stock Line Challenge Prompts

Use each fragrance row to test the subject's explanation against the stock position.

- "Talk me through this fragrance line. What should be on hand and when was it last counted?"
- "Who handled, moved, sold, adjusted, damaged, tested, or accessed this stock?"
- "How do you explain any missing or extra units on this line?"

Amount Check Prompts

Cash Discrepancy Prompts

Use each cash row to challenge shortages, overages, and paperwork gaps.

- "Talk me through this till, banking bag, safe amount, or cash item from start to finish."
- "Who counted it, who verified it, and who had access before the discrepancy was found?"
- "How do you explain any shortage, overage, refund pattern, void, or paperwork mismatch here?"

Internal theft confirmed on CCTV

Specialist CCTV-confirmed internal theft template for cases already evidenced on footage, with linked stock and cash checks.

Template key	`internal_theft_cctv_confirmed`
Form variant	internal-theft
Evidence label	CCTV case evidence
Specialist	Yes
Detail placeholder	Capture what CCTV confirmed, who was identified, the stock or cash loss evidenced, and the case outcome or escalation.

What Checked

CCTV Case Script

Use this flow when the internal theft has already been evidenced on CCTV and the report needs to document the case clearly.

- "State the case reference, who reviewed the footage, and the dates, times, and clips in scope."
- "Describe exactly what CCTV shows: approach, access, concealment, stock or cash handling, and exit."
- "Record how the subject was identified and what supporting records were checked alongside the footage."

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Case / HR / incident reference `[caseReference]`

Input: text | Section: What Checked

Field prompt: Investigation, HR, ER, incident, or case reference linked to the CCTV-confirmed theft.

Capture: Enter the main investigation, HR, ER, or incident reference for the case.

Script questions

- "For the record, this CCTV-confirmed case relates to reference..."

Subject identified / role `[subjectIdentified]`

Input: text | Section: What Checked

Field prompt: Who is identified on CCTV, what is their role, and what access or responsibility did they hold?

Capture: Record the subject name, role, and relevant access such as till use, keyholding, stockroom access, or banking duty.

Script questions

- "Identify the subject shown on CCTV and confirm their role, access, and store responsibility."

Dates / times / CCTV clips in scope `[datesOrClipsInScope]`

Input: textarea | Section: What Checked

Field prompt: Which dates, times, cameras, clip references, shifts, tills, deposits, or stock checks are covered?

Capture: List the dates, times, cameras, clip IDs, tills, deposits, or stock checks tied to this case.

Script questions

- "Record the exact dates, times, cameras, shifts, or clip references that evidence the theft."

CCTV summary / what is seen `[cctvSummary]`

Input: textarea | Section: What Checked

Field prompt: Describe exactly what the CCTV shows, including movements, concealment, till activity, handling of stock or cash, and exit behaviour.

Capture: Write a clear chronological summary of the footage so the theft behaviour is obvious without replaying it.

Script questions

- "Describe, step by step, what the CCTV shows from approach to exit."

Theft method / behaviour observed `[theftMethodObserved]`

Input: textarea | Section: What Checked

Field prompt: Pocketing stock, concealing product, manipulating tills, false refund, void abuse, banking removal, key misuse...

Capture: Record the specific dishonest act or method evidenced on CCTV.

Script questions

- "What method of theft or dishonest behaviour is visible on the footage?"

Stock / cash / process affected `[stockOrCashAffected]`

Input: textarea | Section: What Checked

Field prompt: Which fragrance lines, cash items, tills, refunds, voids, banking steps, or stock processes were affected?

Capture: Record the affected product lines, tills, cash movements, or process stages linked to the case.

Script questions

- "What stock, cash, till, refund, void, or banking process is affected by the CCTV evidence?"

Access / opportunity confirmed `[accessOrOpportunityConfirmed]`

Input: textarea | Section: What Checked

Field prompt: What access, keys, logins, till IDs, stockroom opportunity, or supervision gaps are confirmed by the CCTV timeline?

Capture: Capture the opportunity window and access that the footage confirms the subject had.

Script questions

- "What access, keys, logins, tills, or unattended opportunity is confirmed by the CCTV sequence?"

Findings

Confirmed Findings Script

Use this section to document what the footage proves and what the business impact is. Record material wording verbatim where it matters, separate fact from inference, and avoid opinion.

- "What does the CCTV clearly confirm, and what part of the allegation is now evidenced?"
- "What stock, cash, or process loss is linked to the footage?"
- "What weakness in controls, supervision, keys, till access, or stock handling enabled this?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Supporting evidence / corroboration `[supportingEvidence]`

Input: textarea | Section: Findings

Field prompt: Which till logs, stock counts, statements, rota evidence, refunds, voids, banking paperwork, or audit data support the CCTV finding?

Capture: Record the non-CCTV evidence that corroborates the case.

Script questions

- "What records or evidence support the CCTV finding and strengthen the case?"

Subject response / case status `[responseOrStatus]`

Input: textarea | Section: Findings

Field prompt: Admitted, denied, resigned, suspended, not yet interviewed, disciplinary pending, police referral pending...

Capture: Record whether the subject has been spoken to and the current employment or case status.

Script questions

- "What is the subject response or current case status following the CCTV finding?"

Other people named / implicated `[otherPersonsNamed]`

Input: textarea | Section: Findings

Field prompt: Any other staff, witnesses, process owners, or managers relevant to the confirmed CCTV case.

Capture: List any other person linked to the case and why they matter.

Script questions

- "Are any other people identified, implicated, or needed for follow-up in this CCTV case?"

Actions

Outcome And Handover Script

Use this before closing the report so the evidence chain and next actions are explicit.

- "What footage, exports, logs, statements, or paperwork have been preserved, and who now holds them?"
- "What suspension, disciplinary, recovery, police, or follow-up interview action has been agreed?"
- "Who owns the next step, and by when?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Evidence retained `[evidenceRetained]`

Input: textarea | Section: Actions

Field prompt: What evidence was retained, preserved, exported, or requested?

Capture: Record the evidence that was formally retained or preserved.

Script questions

- "What evidence was retained, preserved, exported, or requested as part of this activity?"

Where evidence is stored `[evidenceStoredAt]`

Input: text | Section: Actions

Field prompt: Shared drive, case folder, system, locker, safe, email chain, police portal...

Capture: State where the evidence is stored so it can be located later.

Script questions

- "Where is the retained evidence now stored?"

Who holds evidence now `[evidenceHeldBy]`

Input: text | Section: Actions

Field prompt: LP officer, store manager, HR, police, courier claims team...

Capture: Name the person or team currently holding the evidence.

Script questions

- "Who currently holds or controls that evidence?"

External involvement `[externalInvolvement]`

Input: text | Section: Actions

Field prompt: Police, HR, insurer, courier claim, supplier claim, contractor ticket, none...

Capture: Record any external party or formal process now involved.

Script questions

- "Is any external party or formal process involved in this case?"

External reference number `[externalReference]`

Input: text | Section: Actions

Field prompt: Police CAD, HR case, insurer claim, courier claim, contractor ticket...

Capture: Record the linked external reference if one exists.

Script questions

- "What external reference number or case number is linked to that involvement?"

Evidence preserved / exported `[evidencePreserved]`

Input: textarea | Section: Actions

Field prompt: Which CCTV clips, exports, screenshots, till logs, banking sheets, stock counts, statements, or device records were secured?

Capture: Record the evidence chain, what was exported, and who now holds it.

Script questions

- "What footage, exports, records, or statements have been preserved, and where are they stored?"

Disciplinary / HR / police action `[disciplinaryOrPoliceEscalation]`

Input: textarea | Section: Actions

Field prompt: Record suspension, disciplinary action, HR / ER steps, resignation, recovery action, or police involvement agreed for the CCTV-confirmed case.

Capture: Record the disciplinary, HR, ER, recovery, or police action agreed after the finding.

Script questions

- "What formal action has been agreed following the confirmed CCTV evidence?"

Recovery / further checks required `[recoveryOrFurtherChecks]`

Input: textarea | Section: Actions

Field prompt: What further stock recount, till reconciliation, recovery, statement taking, footage review, or follow-up action is still required?

Capture: List the remaining recovery, reconciliation, or follow-up work still open on the case.

Script questions

- "What recovery work, reconciliations, or follow-up checks still need completing?"

Counted Item Prompts

CCTV Stock Evidence Prompts

Use each fragrance row for stock lines that appear on CCTV or were confirmed missing during the case review.

- "Which exact fragrance line is seen being handled or removed on CCTV?"
- "What should the stock position have been, and what did the physical or system check confirm?"
- "Does this row support the footage, the loss value, or the recovery position?"

Amount Check Prompts

CCTV Cash Evidence Prompts

Use each cash row for tills, safe counts, banking bags, refunds, or void activity linked to the footage.

- "Which till, banking bag, safe count, refund, or void activity is tied to the CCTV evidence?"
- "What does the footage show compared with the recorded cash position?"
- "What shortage, overage, or unexplained movement does this row prove?"

Interview plan - staff theft

Specialist interview-plan template for Loss Prevention officers interviewing TFS staff about suspected theft, with a full script for each interview stage.

Template key	`staff_theft_interview_plan`
Form variant	structured
Evidence label	Interview-plan evidence
Specialist	Yes
Detail placeholder	Capture the theft interview plan, the evidence discussed, and the staff member responses from opening through close.

What Checked

Interview Opening Script

Use this while opening a Loss Prevention interview with a TFS staff member about suspected theft, setting the tone, and introducing the allegation and evidence.

- "Confirm full name, job title, and length of service, then introduce yourself as the Loss Prevention interviewer."
- "Explain the meeting is part of a fair and objective internal theft investigation and outline how LP investigations can arise."
- "Cover the colleague's role and policy awareness, then put the allegation in neutral terms and present the evidence available."

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Case / incident reference `[caseReference]`

Input: text | Section: What Checked

Field prompt: Investigation, HR, ER, or incident reference linked to the theft interview.

Capture: Enter the main case, incident, HR, or ER reference attached to the interview plan.

Script questions

- "For the record, this interview relates to case / incident reference..."

Employee (subject) `[subjectProfile]`

Input: text | Section: What Checked

Field prompt: Full name, job title, and length of service.

Capture: Record the subject's full name, job title, and service length exactly as confirmed at the start of the meeting.

Script questions

- "Please confirm your full name, current job title, and length of service with The Fragrance Shop."

Interview location `[interviewLocation]`

Input: text | Section: What Checked

Field prompt: Store, office, or meeting room where the interview took place.

Capture: Record the interview location and whether it took place in the store office, another room, or another formal setting.

Script questions

- "For the record, confirm where this interview is taking place and note the exact room or location."

Evidence available `[evidenceAvailable]`

Input: textarea | Section: What Checked

Field prompt: CCTV footage, stock discrepancy, witness account, till data, or other evidence available for the interview.

Capture: Record the evidence available at the point the interview started, including the key allegation-supporting material.

Script questions

- "The evidence currently available for this interview is..."

1. Introduction & formalities `[introductionFormalities]`

Input: textarea | Section: What Checked

Field prompt: Record how full name, job title, service length, interviewer introduction, and internal-investigation context were covered.

Capture: Summarise how the introduction and formalities were covered at the start of the meeting.

Script questions

- "Before we begin, I need to confirm your full name, job title, and length of service."
- "My name is [name], my role is [role], and my investigative background is [background]."
- "This meeting forms part of an internal investigation and I will keep the questions neutral and factual."

2. Setting the tone `[toneSetting]`

Input: textarea | Section: What Checked

Field prompt: Record how fairness, objectivity, investigation scope, and investigation methods were explained.

Capture: Record how the fair-process explanation and investigation context were set out to the subject.

Script questions

- "This investigation will be conducted fairly and objectively."
- "People can make mistakes for different reasons, and this meeting is to understand what happened."
- "Loss Prevention investigates theft of cash, theft of stock, and fraudulent transactions involving the business."
- "Those investigations may arise from whistleblowing, CCTV review, stock discrepancies, till data, or other evidence."

3. General questions `[generalQuestions]`

Input: textarea | Section: What Checked

Field prompt: Summarise the subject response about their day-to-day role and understanding of company policies.

Capture: Summarise the subject's account of their role and their understanding of the relevant company policies.

Script questions

- "Talk me through your normal day-to-day role in the store."
- "What is your understanding of the company policies that apply to stock, testers, cash, and unpaid items?"

4. Policy awareness `[policyAwareness]`

Input: textarea | Section: What Checked

Field prompt: Record how the subject described the removal of an unpaid item and whether they accepted it would be theft / misconduct.

Capture: Record the subject's policy-awareness answer and whether they acknowledged the expected theft / misconduct position.

Script questions

- "How would the removal of an unpaid item from the store be viewed by the company?"
- "Do you understand that removing an unpaid item would amount to theft or misconduct?"

5. Introduction of allegation `[allegationIntroduction]`

Input: textarea | Section: What Checked

Field prompt: Record exactly how the removal-of-stock-without-payment allegation was put in neutral terms.

Capture: Record exactly how the allegation was introduced, keeping it neutral and non-specific at the outset.

Script questions

- "The allegation being investigated is the removal of stock or company property from the business without payment."
- "At this stage I am putting that allegation to you in general terms and asking for your response."

6. Presentation of evidence `[evidencePresentation]`

Input: textarea | Section: What Checked

Field prompt: Record how the CCTV was shown and what explanation the subject gave when asked what they could see.

Capture: Summarise how the evidence was presented and the subject's immediate explanation of what it showed.

Script questions

- "I am now showing you the evidence relied on in this investigation."
- "Please explain, in your own words, what you can see and what was happening at that point."

Findings

Challenge And Wider Enquiry Script

Use this section to capture the direct answers given, the explanation of the evidence, and whether the theft concern is isolated or wider. Record material wording verbatim where it matters, separate fact from inference, and avoid opinion.

- "Ask the colleague to explain what they see on the evidence and then ask directly whether any item was removed without payment."
- "Ask what was taken and record the answer accurately in their own words."
- "Explore whether this was the first occurrence or whether there are any other incidents to disclose, without leading the answer."

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

7. Direct questioning `[directQuestioning]`

Input: textarea | Section: Findings

Field prompt: Record the answers given when asked directly whether any item was removed without payment and what item was taken.

Capture: Record the direct answers given when the theft allegation was put plainly and the subject was asked to explain.

Script questions

- "Did you remove any item from the store without paying for it?"
- "What item or items were taken?"
- "I am recording your answers accurately, so please explain in your own words what happened."

8. Wider investigation `[widerInvestigation]`

Input: textarea | Section: Findings

Field prompt: Summarise what was said about whether this was the first occurrence and whether any other incidents were disclosed.

Capture: Summarise what was said about any previous or wider incidents while keeping the notes factual and non-leading.

Script questions

- "Was this the first time anything like this has happened?"
- "Are there any other incidents involving stock, testers, cash, or unpaid items that you need to disclose?"
- "I am not going to lead you; I need you to answer in your own words and I will document your response exactly."

Actions

Closing And Escalation Script

Use this before ending the meeting so the close, evidence review, escalation, and pending outcome are documented clearly.

- "Summarise the key points back to the colleague and offer the chance to add anything further."
- "Explain the next steps and the internal review process after the interview."
- "Record the post-interview evidence review, escalation to the appropriate Regional Director and stakeholders, and pending outcome stage."

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Evidence retained `[evidenceRetained]`

Input: textarea | Section: Actions

Field prompt: What evidence was retained, preserved, exported, or requested?

Capture: Record the evidence that was formally retained or preserved.

Script questions

- "What evidence was retained, preserved, exported, or requested as part of this activity?"

Where evidence is stored `[evidenceStoredAt]`

Input: text | Section: Actions

Field prompt: Shared drive, case folder, system, locker, safe, email chain, police portal...

Capture: State where the evidence is stored so it can be located later.

Script questions

- "Where is the retained evidence now stored?"

Who holds evidence now `[evidenceHeldBy]`

Input: text | Section: Actions

Field prompt: LP officer, store manager, HR, police, courier claims team...

Capture: Name the person or team currently holding the evidence.

Script questions

- "Who currently holds or controls that evidence?"

External involvement `[externalInvolvement]`

Input: text | Section: Actions

Field prompt: Police, HR, insurer, courier claim, supplier claim, contractor ticket, none...

Capture: Record any external party or formal process now involved.

Script questions

- "Is any external party or formal process involved in this case?"

External reference number `[externalReference]`

Input: text | Section: Actions

Field prompt: Police CAD, HR case, insurer claim, courier claim, contractor ticket...

Capture: Record the linked external reference if one exists.

Script questions

- "What external reference number or case number is linked to that involvement?"

9. Closing the interview `[closingInterview]`

Input: textarea | Section: Actions

Field prompt: Record the key summary given, any final comments offered, and how next steps were explained.

Capture: Record how the meeting was summarised, whether the subject added anything further, and what next-step explanation was given.

Script questions

- "To summarise, the key points from this interview are..."
- "Is there anything further you want to add before we close the meeting?"
- "The next step is for the evidence and your account to be reviewed through the internal process."

10. Post-interview actions `[postInterviewActions]`

Input: textarea | Section: Actions

Field prompt: Record the evidence review, Steve Brant escalation, and the pending outcome position.

Capture: Record the post-interview action plan exactly, including the evidence review, escalation route, and pending outcome stage.

Script questions

- "Following this interview, the evidence will be reviewed again in full."
- "The case will be escalated to the appropriate Regional Director and any other relevant stakeholders for review."
- "After that review, the business will await the outcome of the internal process."

Red stock count investigation

Investigates red stock-count results by questioning staff, reviewing deliveries, and line-checking fragrances to assess internal theft, external theft, or lack of process.

Template key	`red_stock_count_investigation`
Form variant	line-check
Evidence label	Red stock-count evidence
Specialist	No
Detail placeholder	Capture the red stock-count concern, the delivery and staff checks completed, the fragrance lines reviewed, and the likely cause assessment.

What Checked

Red Stock Count Review Script

Use this while opening a red stock-count visit, questioning staff, reviewing deliveries, and checking the priority fragrance lines.

- "Confirm what red stock-count result triggered the visit, which period is in scope, and which staff are being spoken to."
- "Walk the delivery process, shortages, damages, transfers, testers, and adjustments with the store team."
- "Use the fragrance line checks to test whether the losses point more toward internal theft, external theft, or lack of process."

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Red stock-count context `[redCountContext]`

Input: textarea | Section: What Checked

Field prompt: What red result triggered the visit, for what period, and how significant is the variance?

Capture: Record the red result, time period, variance value or percentage, and why the store required this investigation visit.

Script questions

- "What red stock-count result triggered this visit, what period is in scope, and what is the headline variance?"

Staff / managers questioned `[staffRolesQuestioned]`

Input: textarea | Section: What Checked

Field prompt: Which managers, keyholders, advisors, or stock handlers were spoken to during the visit?

Capture: List the staff members, managers, or keyholders questioned and why they were relevant to the stock-loss enquiry.

Script questions

- "Which members of the store team have you spoken to about the red stock count, and what is each person's role?"

Delivery / paperwork checks completed `[deliveryChecksCompleted]`

Input: textarea | Section: What Checked

Field prompt: Which deliveries, shortages, damages, transfers, claims, or paperwork sets were checked?

Capture: Record the delivery review completed, including paperwork, shortages, damages, claims, transfers, and any gaps found in the process.

Script questions

- "Talk me through the recent deliveries, shortages, damages, transfers, and any supporting paperwork we need to check."
- "Which delivery records, claims, or stock-control documents have been reviewed as part of this visit?"

Stock-control questions asked `[stockControlQuestionsAsked]`

Input: textarea | Section: What Checked

Field prompt: What was asked about adjustments, testers, damages, transfers, counts, stockroom control, and handling of live stock?

Capture: Record the stock-control questions put to staff so the report shows how the process was tested during the visit.

Script questions

- "Talk me through how deliveries are checked in, how testers, damages, and adjustments are controlled, and how counts are completed."
- "Who normally handles the high-risk lines, the stockroom, and the adjustment process?"

External-theft exposure reviewed `[externalTheftExposureChecked]`

Input: textarea | Section: What Checked

Field prompt: What sales-floor exposure, tester/live-stock controls, CCTV coverage, greeting standards, or hotspot risks were checked?

Capture: Record the shop-floor and security controls reviewed to test whether external theft is a likely driver of the red result.

Script questions

- "What external-theft risks have we checked today, including floor exposure, tester control, live stock on display, greeting, and CCTV coverage?"

Findings

Cause Assessment Script

Use this section to compare what staff said against the delivery review, stock line results, and store-floor exposure so the likely cause is clear.

- "What explanation are staff giving for the red result, and does it stand up against the evidence?"
- "Which indicators point toward internal theft, which point toward external theft, and which point toward poor process or weak stock control?"
- "At this stage, what is the most likely driver of the red stock count, and why?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Staff explanation / account `[staffExplanationSummary]`

Input: textarea | Section: Findings

Field prompt: What explanation did staff give for the red stock count and the missing lines?

Capture: Summarise the explanation given by the team for the red result, using their wording where it matters.

Script questions

- "What explanation are you giving for the red stock-count result and the missing stock lines?"

Delivery / stock paperwork findings `[deliveryFindings]`

Input: textarea | Section: Findings

Field prompt: What did the delivery and paperwork review actually show?

Capture: Record the key findings from the delivery and paperwork review, including whether shortages or process gaps were evidenced.

Script questions

- "What did the delivery checks, shortage review, and paperwork comparison actually show?"

Indicators pointing to internal theft `[internalTheftIndicators]`

Input: textarea | Section: Findings

Field prompt: What patterns, access issues, behaviour, or unexplained movements point toward internal theft?

Capture: List the indicators that make internal theft a possible or likely cause of the red result.

Script questions

- "What evidence, behaviour, access, or stock pattern points toward internal theft?"

Indicators pointing to external theft `[externalTheftIndicators]`

Input: textarea | Section: Findings

Field prompt: What product exposure, hotspot, customer access, or repeat shoplifting risk points toward external theft?

Capture: List the indicators that make external theft a possible or likely cause of the red result.

Script questions

- "What evidence or store-floor exposure points toward external theft as the driver of the losses?"

Indicators pointing to lack of process `[processGapIndicators]`

Input: textarea | Section: Findings

Field prompt: What failures in delivery checking, adjustments, counts, damages, testers, or stockroom control point toward lack of process?

Capture: List the indicators that suggest the red result is being driven by weak process rather than theft alone.

Script questions

- "What failures in process, paperwork, stock handling, or count discipline point toward lack of process?"

Most likely driver at this stage `[likelyCauseType]`

Input: select | Section: Findings

Field prompt: Select likely cause

Capture: Select the most likely overall cause based on the visit findings so far.

Script questions

- "At this stage, does the evidence point more toward internal theft, external theft, lack of process, mixed factors, or is it still inconclusive?"

Likely-cause rationale `[likelyCauseRationale]`

Input: textarea | Section: Findings

Field prompt: Why is that the most likely driver of the red stock count at this stage?

Capture: Summarise the reasoning behind the likely-cause assessment, linking it to the staff questioning, delivery checks, and line-check results.

Script questions

- "Explain why that is the most likely driver of the red stock count at this stage."

Actions

Containment And Follow-up Script

Use this before closing the visit so immediate controls, recounts, coaching, and escalation are all documented clearly.

- "What needs correcting or securing immediately before the visit closes?"
- "What further recounts, delivery checks, or investigation work are still required?"
- "Who owns the next step, and what follow-up or escalation will now happen?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Recounts / further checks required `[recountsOrFurtherChecks]`

Input: textarea | Section: Actions

Field prompt: What further line checks, delivery checks, recounts, or investigation steps are still required?

Capture: Record the additional checks or investigation work still required after the visit.

Script questions

- "What further line checks, recounts, delivery checks, or investigation steps still need to be completed?"

Controls / coaching issued on site `[controlsOrCoachingIssued]`

Input: textarea | Section: Actions

Field prompt: What process fixes, stock controls, delivery disciplines, or staff coaching were put in place during the visit?

Capture: Record the immediate process corrections, controls, or coaching delivered during the visit.

Script questions

- "What process fixes, stock controls, or coaching were put in place on site before the visit closed?"

Investigation / escalation path `[investigationEscalation]`

Input: textarea | Section: Actions

Field prompt: Who is the case being escalated to, and what will happen next if theft or process failure remains suspected?

Capture: Record the escalation route and the next stage of the investigation or process follow-up.

Script questions

- "Who is this being escalated to, and what is the next investigation or management step after today's visit?"

Counted Item Prompts

Red Count Fragrance Prompts

Use the live fragrance search to select the high-variance lines, capture the system and counted positions, and test what is driving the loss.

- "Which fragrance line are we checking here, what is the website price, and why is this line in scope for the red result?"
- "What should the stock position be, what was physically counted, and when was this line last delivered, sold, adjusted, tested, or damaged?"
- "Does the variance on this line point more toward internal theft, external theft, or lack of process?"

Investigation work

Supported or progressed a theft, fraud, or conduct investigation.

Template key	`supported_investigation`
Form variant	structured
Evidence label	Investigation evidence
Specialist	No
Detail placeholder	Add the investigation context, evidence reviewed, and next actions agreed.

What Checked

Investigation Support Script

Use this when documenting the investigation scope and the work completed on site.

- "What allegation, incident, or loss event is this investigation focused on?"
- "Who are the subjects, witnesses, or relevant staff in scope?"
- "What evidence did you review to progress the case?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Case reference `[caseReference]`

Input: text | Section: What Checked

Field prompt: Incident, case, or investigation reference...

Capture: Enter the case or incident reference tied to the investigation.

Script questions

- "What case, incident, or investigation reference does this work relate to?"

Investigation focus `[investigationFocus]`

Input: textarea | Section: What Checked

Field prompt: What allegation, loss event, or concern was investigated?

Capture: Describe the main investigation focus in clear terms.

Script questions

- "What allegation, loss event, or conduct issue are we investigating?"

Subjects / people involved `[subjectsInvolved]`

Input: text | Section: What Checked

Field prompt: Offender, employee, witness, contractor, customer...

Capture: List the key people linked to the investigation and their role.

Script questions

- "Who are the subjects, witnesses, or other people involved in this case?"

Evidence reviewed `[evidenceReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, till records, statements, refunds, stock movements...

Capture: Record the CCTV, paperwork, statements, logs, or data reviewed.

Script questions

- "What evidence did you review to progress the investigation?"

Findings

Investigation Findings Script

Use this section to capture the strongest LP concern and what the evidence suggests.

- "What does the evidence indicate so far?"
- "What fraud indicator, theft method, or process bypass is the key LP concern?"
- "What control weakness or exposure sits behind the case?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Key LP concern identified `[keyLPConcern]`

Input: textarea | Section: Findings

Field prompt: Fraud indicator, repeat theft method, process bypass, collusion concern...

Capture: Summarise the key fraud, theft, collusion, or control concern emerging from the case.

Script questions

- "What is the main LP concern or method identified so far?"

Actions

Investigation Handover Script

Use this to record the work you completed and the case status when you left.

- "What investigation work did you complete on site today?"
- "Who was the case escalated or handed over to?"
- "What is the next step and who owns it?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Evidence retained `[evidenceRetained]`

Input: textarea | Section: Actions

Field prompt: What evidence was retained, preserved, exported, or requested?

Capture: Record the evidence that was formally retained or preserved.

Script questions

- "What evidence was retained, preserved, exported, or requested as part of this activity?"

Where evidence is stored `[evidenceStoredAt]`

Input: text | Section: Actions

Field prompt: Shared drive, case folder, system, locker, safe, email chain, police portal...

Capture: State where the evidence is stored so it can be located later.

Script questions

- "Where is the retained evidence now stored?"

Who holds evidence now `[evidenceHeldBy]`

Input: text | Section: Actions

Field prompt: LP officer, store manager, HR, police, courier claims team...

Capture: Name the person or team currently holding the evidence.

Script questions

- "Who currently holds or controls that evidence?"

External involvement `[externalInvolvement]`

Input: text | Section: Actions

Field prompt: Police, HR, insurer, courier claim, supplier claim, contractor ticket, none...

Capture: Record any external party or formal process now involved.

Script questions

- "Is any external party or formal process involved in this case?"

External reference number `[externalReference]`

Input: text | Section: Actions

Field prompt: Police CAD, HR case, insurer claim, courier claim, contractor ticket...

Capture: Record the linked external reference if one exists.

Script questions

- "What external reference number or case number is linked to that involvement?"

Work completed on site `[workCompleted]`

Input: textarea | Section: Actions

Field prompt: Explain what the LP officer did during the visit.

Capture: Explain what steps you completed during the visit.

Script questions

- "What investigation work did you personally complete on site?"

Outcome / escalation `[outcomeOrEscalation]`

Input: textarea | Section: Actions

Field prompt: Record the current outcome or who it was escalated to.

Capture: Record the case status, escalation, or agreed next stage.

Script questions

- "What is the current outcome or escalation point for the case?"

CCTV / alarm review

Checked CCTV coverage, alarm usage, or security equipment.

Template key	`reviewed_cctv_or_alarm`
Form variant	structured
Evidence label	CCTV / alarm evidence
Specialist	No
Detail placeholder	Note what was tested or reviewed and any system issues or training points.

What Checked

CCTV / Alarm Review Script

Use this while checking coverage, playback, alarms, and equipment health.

- "Which cameras, alarm points, recorders, or panic systems were checked?"
- "Which areas of the store were reviewed for coverage or response?"
- "What playback, date-time, export, or function tests were completed?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Systems checked `[systemsChecked]`

Input: textarea | Section: What Checked

Field prompt: Which cameras, alarm points, DVRs, or panic systems were reviewed?

Capture: List the security systems or devices reviewed.

Script questions

- "Which cameras, alarm points, or recorders were checked?"

Areas reviewed `[areasReviewed]`

Input: textarea | Section: What Checked

Field prompt: Sales floor, till area, stockroom, entrance, fire exit...

Capture: Record the physical areas reviewed during the equipment check.

Script questions

- "Which store areas were checked for coverage or alarm response?"

Function / playback test completed `[functionTestCompleted]`

Input: textarea | Section: What Checked

Field prompt: Playback checked, panic alarm tested, date/time reviewed, engineer status confirmed...

Capture: Summarise the tests completed on the CCTV or alarm system.

Script questions

- "What playback, test, or function checks were completed?"

Findings

Security Equipment Findings Script

Use this section to describe the weakness in coverage or evidence quality.

- "What faults, blind spots, or usage issues were identified?"
- "Does the system produce usable evidence, and if not why not?"
- "What loss risk or investigative gap does the weakness create?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Faults / blind spots found `[faultsFound]`

Input: textarea | Section: Findings

Field prompt: Record any dead cameras, blind spots, alarm faults, or usage issues.

Capture: Record the defects or weaknesses identified in the system.

Script questions

- "What faults, blind spots, or equipment failures were found?"

Evidence quality concern `[evidenceQuality]`

Input: textarea | Section: Findings

Field prompt: Facial ID issue, poor angle, poor lighting, export issue, retention concern...

Capture: Capture any evidence-quality concern such as poor image, angle, export, or retention.

Script questions

- "Is the footage or alarm output usable, and if not what is the problem?"

Actions

Security Equipment Action Script

Use this to record the interim control and any contractor or helpdesk escalation.

- "What was fixed, reset, or coached immediately?"
- "Was a callout, ticket, or contractor referral raised?"
- "Who owns the follow-up and when should it be complete?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Evidence retained `[evidenceRetained]`

Input: textarea | Section: Actions

Field prompt: What evidence was retained, preserved, exported, or requested?

Capture: Record the evidence that was formally retained or preserved.

Script questions

- "What evidence was retained, preserved, exported, or requested as part of this activity?"

Where evidence is stored `[evidenceStoredAt]`

Input: text | Section: Actions

Field prompt: Shared drive, case folder, system, locker, safe, email chain, police portal...

Capture: State where the evidence is stored so it can be located later.

Script questions

- "Where is the retained evidence now stored?"

Who holds evidence now `[evidenceHeldBy]`

Input: text | Section: Actions

Field prompt: LP officer, store manager, HR, police, courier claims team...

Capture: Name the person or team currently holding the evidence.

Script questions

- "Who currently holds or controls that evidence?"

External involvement `[externalInvolvement]`

Input: text | Section: Actions

Field prompt: Police, HR, insurer, courier claim, supplier claim, contractor ticket, none...

Capture: Record any external party or formal process now involved.

Script questions

- "Is any external party or formal process involved in this case?"

External reference number `[externalReference]`

Input: text | Section: Actions

Field prompt: Police CAD, HR case, insurer claim, courier claim, contractor ticket...

Capture: Record the linked external reference if one exists.

Script questions

- "What external reference number or case number is linked to that involvement?"

Action agreed `[actionsAgreed]`

Input: textarea | Section: Actions

Field prompt: Training given, engineer callout, escalation, or immediate fix.

Capture: Record the action agreed to address the equipment issue.

Script questions

- "What fix, reset, training, or escalation was agreed?"

Callout / ticket reference `[calloutOrTicketReference]`

Input: text | Section: Actions

Field prompt: Engineer ticket, contractor job number, helpdesk ref...

Capture: Enter the ticket or callout reference if one was created.

Script questions

- "Was a helpdesk, contractor, or engineer reference raised?"

Loss controls review

Reviewed shrink controls, hotspots, and in-store LP standards.

Template key	`reviewed_loss_controls`
Form variant	structured
Evidence label	Loss-control evidence
Specialist	No
Detail placeholder	Describe the control weaknesses, hotspots, and any immediate fixes completed.

What Checked

Loss Controls Review Script

Use this while walking shrink controls, risk hotspots, and display standards.

- "Which controls, fixtures, or routines are we reviewing today?"
- "Which theft hotspots or high-risk areas did we prioritise?"
- "Which high-risk products, cabinets, or stock locations were checked?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Controls checked `[controlsChecked]`

Input: textarea | Section: What Checked

Field prompt: Tagging, cabinet locking, tester control, refund control, stockroom security...

Capture: List the controls, fixtures, or procedures reviewed.

Script questions

- "Which shrink controls or LP standards were checked?"

Hotspots reviewed `[hotspotsReviewed]`

Input: textarea | Section: What Checked

Field prompt: Which theft hotspots or risk areas were checked?

Capture: Record the hotspots or vulnerable areas covered during the review.

Script questions

- "Which theft hotspots or risk areas were reviewed?"

High-risk products / areas reviewed `[highRiskProductsReviewed]`

Input: textarea | Section: What Checked

Field prompt: Which high-risk SKUs, fixtures, or stock locations were prioritised?

Capture: List the key products, SKUs, or areas reviewed for loss exposure.

Script questions

- "Which high-risk products or locations were prioritised?"

Findings

Loss Controls Findings Script

Use this to record where the control standard is weak and what risk it creates.

- "What standards were missed or inconsistently applied?"
- "Where is the biggest deterrence or visibility gap?"
- "What root cause or behaviour is leaving the store exposed?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Weaknesses found `[weaknessesFound]`

Input: textarea | Section: Findings

Field prompt: Record the control gaps or standards missed.

Capture: Summarise the weaknesses identified in the store controls.

Script questions

- "What control gaps or missed standards did you find?"

Deterrence / visibility gap `[deterrenceGap]`

Input: textarea | Section: Findings

Field prompt: Poor greeting, weak guarding, exposed stock, blind spot, lack of signage...

Capture: Record the deterrence issue or visibility gap that leaves stock exposed.

Script questions

- "Where is the deterrence, visibility, or guarding gap?"

Actions

Loss Controls Action Script

Use this to capture what was fixed on site and what still needs owning.

- "What was corrected, re-merchandised, secured, or coached immediately?"
- "Who was updated or briefed about the control gap?"
- "Who owns the remaining corrective action and by when?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Corrective action agreed `[correctiveAction]`

Input: textarea | Section: Actions

Field prompt: What was fixed on site or agreed with the team?

Capture: Capture what was fixed on site and what was agreed for follow-up.

Script questions

- "What corrective action was completed or agreed with the team?"

Opening checks

Completed an opening / open-up security review before trading began.

Template key	`conducted_opening_checks`
Form variant	structured
Evidence label	Opening-check evidence
Specialist	No
Detail placeholder	Record who opened, what was checked before trade, and any exposure identified at open.

What Checked

Opening Checks Script

Use this while completing the opening routine before the store trades.

- "Who is opening the site and who holds key responsibility this morning?"
- "Which opening checks were physically completed before trading began?"
- "What was the status of alarms, access points, shutters, safe controls, and high-risk stock at open?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Team present / opening responsibility `[teamPresentAtOpen]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, security, or colleague opening the store...

Capture: List the keyholder, manager, security colleague, or other team members present at open.

Script questions

- "Who is opening the site and who holds responsibility this morning?"

Opening checks completed `[openingChecksCompleted]`

Input: textarea | Section: What Checked

Field prompt: Shutters, doors, alarm unset, fire exits, stockroom, sales floor, safe, and trading-readiness checks...

Capture: Record the specific opening checks completed before the store opened.

Script questions

- "Which opening checks were physically completed before trading began?"

Alarm / access / entry status `[alarmAndAccessStatus]`

Input: textarea | Section: What Checked

Field prompt: Alarm unset correctly, no forced entry, locks secure, shutters intact, access points checked...

Capture: Summarise the opening status of alarms, access points, shutters, and locks.

Script questions

- "What was the status of alarms, shutters, locks, and entry points at open?"

Safe / high-risk stock status `[safeAndHighRiskStockStatus]`

Input: textarea | Section: What Checked

Field prompt: Safe condition, cabinets intact, tagged stock present, tester/live stock control, fragrance wall ready...

Capture: Describe the condition of the safe, cabinets, high-risk stock, and trading-readiness controls.

Script questions

- "What was the status of the safe, high-risk stock, and protected fixtures at open?"

Findings

Opening Checks Findings Script

Use this section to capture any exposure identified before the store opened to customers.

- "Was there any sign of forced entry, alarm fault, unsecured access point, or missing control at open?"
- "Was any stock, safe content, key, or high-risk area exposed or not ready for trade?"
- "What weakness in the opening routine, handover, or security control caused the issue?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Issues found at opening `[issuesAtOpen]`

Input: textarea | Section: Findings

Field prompt: Record any alarm issue, stock exposure, key-control gap, readiness failure, or opening concern.

Capture: Describe the opening concern or operational issue found before trade.

Script questions

- "What issue, missed step, or exposure did you find during the opening routine?"

Signs of entry / exposure `[signsOfEntryOrExposure]`

Input: textarea | Section: Findings

Field prompt: Forced entry, damaged shutter, insecure door, missing key, exposed stock, safe concern, blind spot...

Capture: Record any sign of entry, damaged security measure, or exposed stock/control issue.

Script questions

- "Was there any sign of forced entry, damage, or stock/security exposure?"

Actions

Opening Checks Action Script

Use this before the doors open so any immediate fix or escalation is clearly documented.

- "What was corrected, secured, or isolated before customers were admitted?"
- "Who was informed about the opening concern or exposure?"
- "What follow-up action is still needed after the opening checks?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Actions before trading `[actionsBeforeTrading]`

Input: textarea | Section: Actions

Field prompt: What was secured, escalated, or corrected before the store opened to customers?

Capture: Capture the actions completed before trade and any escalation made from the opening check.

Script questions

- "What was corrected, secured, or escalated before the doors opened?"

Stop on close

Completed an end-of-day stop-on-close review with the store team.

Template key	`conducted_stop_on_close`
Form variant	structured
Evidence label	Stop-on-close evidence
Specialist	No
Detail placeholder	Record who was present, what was checked at close, and any concerns identified.

What Checked

Stop On Close Script

Use this while walking the closing routine with the team before final lock-up.

- "Who is present for close and who holds key responsibility tonight?"
- "Which closing checks were physically completed before lock-up?"
- "How were cash, keys, alarms, and final access controls verified?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Team present `[teamPresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, staff members, guard...

Capture: List the staff, manager, keyholder, or guard present at close.

Script questions

- "Who was present for close and who held responsibility?"

Closing checks completed `[closingChecksCompleted]`

Input: textarea | Section: What Checked

Field prompt: Cash secure, doors checked, stockroom clear, alarm set, keys controlled...

Capture: Record the specific closing checks completed during the visit.

Script questions

- "Which close-down checks were physically completed?"

Cash / keys / alarm verification `[cashAndKeysVerified]`

Input: textarea | Section: What Checked

Field prompt: Who held keys, how cash was secured, alarm set confirmation, locking checks...

Capture: Summarise how key security items were checked before lock-up.

Script questions

- "How were cash, keys, and alarm status verified?"

Findings

Stop On Close Findings Script

Use this section to record any exposure left in the close-down process.

- "What steps were missed, rushed, or completed incorrectly at close?"
- "Was any stock, cash, key, alarm, or access point left exposed?"
- "What weakness in process or supervision caused the issue?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Issues found at close `[issuesAtClose]`

Input: textarea | Section: Findings

Field prompt: Record any missed steps, unsecured stock, or process breaches.

Capture: Describe the close-down issue or security concern identified.

Script questions

- "What issue, missed step, or exposure did you find at close?"

Actions

Stop On Close Action Script

Use this before leaving so the final corrections and ownership are documented.

- "What was corrected before the team left the building?"
- "Who was informed about any close-down concern?"
- "What follow-up action is still needed after tonight?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Actions before leaving `[actionsBeforeLeaving]`

Input: textarea | Section: Actions

Field prompt: What was corrected or agreed before the store closed?

Capture: Record the final corrections or agreements completed before leaving.

Script questions

- "What did you put right before the team left site?"

Statements / interviews

Took statements, interviews, or witness accounts as part of follow-up work.

Template key	`took_statements_or_interviews`
Form variant	structured
Evidence label	Statement evidence
Specialist	No
Detail placeholder	Summarise who was spoken to, what evidence was captured, and any follow-up needed.

What Checked

Statement / Interview Script

Use this while taking the account so the purpose, attendees, and records are clear.

- "What case or incident does this statement or interview relate to?"
- "Who was spoken to and in what capacity?"
- "What evidence, notes, or signed records were captured during the meeting?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Case reference `[caseReference]`

Input: text | Section: What Checked

Field prompt: Incident, statement, or HR reference...

Capture: Enter the relevant case or incident reference.

Script questions

- "What case or incident reference does this statement relate to?"

People spoken to `[peopleSpokenTo]`

Input: text | Section: What Checked

Field prompt: Who provided a statement or interview on site?

Capture: List the people spoken to and their role.

Script questions

- "Who gave a statement or interview during this visit?"

Statement purpose `[statementPurpose]`

Input: textarea | Section: What Checked

Field prompt: What was the statement or interview for?

Capture: Record what the statement or interview was intended to establish.

Script questions

- "What was the purpose of taking this statement or interview?"

Records / evidence captured `[recordsCaptured]`

Input: textarea | Section: What Checked

Field prompt: Signed statement, audio note, witness notes, CCTV clip, HR notes...

Capture: List the signed forms, notes, recordings, or related evidence captured.

Script questions

- "What statement records, notes, or supporting evidence were captured?"

Findings

Statement Findings Script

Use this section to summarise the key points and where they help or harm the case.

- "What are the main points from the account you captured?"
- "What part of the statement supports, contradicts, or adds to the evidence?"
- "What loss concern or process issue becomes clearer after this account?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Key points captured `[keyPointsCaptured]`

Input: textarea | Section: Findings

Field prompt: Summarise the main account or evidence captured.

Capture: Summarise the main evidence or account obtained from the interview.

Script questions

- "What are the main points from the account you captured?"

Actions

Statement Handover Script

Use this to record storage, handover, and any further witness work required.

- "Who now holds the statement or interview record?"
- "What further interviews, statements, or paperwork are still required?"
- "Who owns the next step and by when?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Evidence retained `[evidenceRetained]`

Input: textarea | Section: Actions

Field prompt: What evidence was retained, preserved, exported, or requested?

Capture: Record the evidence that was formally retained or preserved.

Script questions

- "What evidence was retained, preserved, exported, or requested as part of this activity?"

Where evidence is stored `[evidenceStoredAt]`

Input: text | Section: Actions

Field prompt: Shared drive, case folder, system, locker, safe, email chain, police portal...

Capture: State where the evidence is stored so it can be located later.

Script questions

- "Where is the retained evidence now stored?"

Who holds evidence now `[evidenceHeldBy]`

Input: text | Section: Actions

Field prompt: LP officer, store manager, HR, police, courier claims team...

Capture: Name the person or team currently holding the evidence.

Script questions

- "Who currently holds or controls that evidence?"

External involvement `[externalInvolvement]`

Input: text | Section: Actions

Field prompt: Police, HR, insurer, courier claim, supplier claim, contractor ticket, none...

Capture: Record any external party or formal process now involved.

Script questions

- "Is any external party or formal process involved in this case?"

External reference number `[externalReference]`

Input: text | Section: Actions

Field prompt: Police CAD, HR case, insurer claim, courier claim, contractor ticket...

Capture: Record the linked external reference if one exists.

Script questions

- "What external reference number or case number is linked to that involvement?"

Follow-up required `[followUpRequired]`

Input: textarea | Section: Actions

Field prompt: Any next interviews, witness requests, or paperwork still needed.

Capture: Record the follow-up work still required after this statement.

Script questions

- "What further interviews, witness work, or paperwork is still needed?"

Evidence stored / handed to `[evidenceStored]`

Input: text | Section: Actions

Field prompt: Who received the statement or where the evidence was stored.

Capture: State where the record was stored or who received it.

Script questions

- "Who holds the statement or where has the evidence been stored?"

Paperwork / process review

Reviewed weekly paperwork, process compliance, or stockroom standards.

Template key	`reviewed_paperwork_or_processes`
Form variant	structured
Evidence label	Process review evidence
Specialist	No
Detail placeholder	List the paperwork or processes reviewed and any corrective actions agreed.

What Checked

Paperwork / Process Review Script

Use this while walking compliance records and process stages with the store team.

- "Which paperwork, reports, or store processes are we reviewing?"
- "Which area and time period does the review cover?"
- "What records or files support the process being tested?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Paperwork / processes checked `[paperworkChecked]`

Input: textarea | Section: What Checked

Field prompt: Weekly paperwork, refunds, damages, deliveries, stockroom process...

Capture: List the paperwork or processes reviewed.

Script questions

- "Which paperwork sets or process steps were checked?"

Areas reviewed `[areasReviewed]`

Input: textarea | Section: What Checked

Field prompt: Back office, till point, stockroom, manager files...

Capture: Record the store areas or admin locations covered by the check.

Script questions

- "Which physical areas or files were included in the review?"

Period covered `[periodCovered]`

Input: text | Section: What Checked

Field prompt: Today, week ending, previous month, last delivery cycle...

Capture: Record the time period examined during the process review.

Script questions

- "What date range or operating period does the review cover?"

Findings

Process Compliance Findings Script

Use this to record where compliance failed and whether the issue is repeat behaviour.

- "What missing paperwork, inaccurate record, or process breach was found?"
- "Is this isolated or a repeat gap?"
- "What control weakness allowed the non-compliance to continue?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Non-compliance found `[nonComplianceFound]`

Input: textarea | Section: Findings

Field prompt: Record any missing paperwork or process breaches.

Capture: Describe the non-compliance issue identified.

Script questions

- "What missing paperwork, inaccurate record, or process breach was found?"

Repeat process gap `[repeatProcessGap]`

Input: textarea | Section: Findings

Field prompt: Is this a repeat issue or isolated? Note the control weakness or repeat behaviour.

Capture: Record whether the issue is repeat behaviour and what weakness it shows.

Script questions

- "Is this a repeat process issue or an isolated miss?"

Actions

Process Compliance Action Script

Use this section to document the correction, coaching, and follow-up owner.

- "What was corrected or completed on site?"
- "Who was briefed or escalated to about the compliance gap?"
- "Who owns the follow-up and by when?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Evidence retained `[evidenceRetained]`

Input: textarea | Section: Actions

Field prompt: What evidence was retained, preserved, exported, or requested?

Capture: Record the evidence that was formally retained or preserved.

Script questions

- "What evidence was retained, preserved, exported, or requested as part of this activity?"

Where evidence is stored `[evidenceStoredAt]`

Input: text | Section: Actions

Field prompt: Shared drive, case folder, system, locker, safe, email chain, police portal...

Capture: State where the evidence is stored so it can be located later.

Script questions

- "Where is the retained evidence now stored?"

Who holds evidence now `[evidenceHeldBy]`

Input: text | Section: Actions

Field prompt: LP officer, store manager, HR, police, courier claims team...

Capture: Name the person or team currently holding the evidence.

Script questions

- "Who currently holds or controls that evidence?"

External involvement `[externalInvolvement]`

Input: text | Section: Actions

Field prompt: Police, HR, insurer, courier claim, supplier claim, contractor ticket, none...

Capture: Record any external party or formal process now involved.

Script questions

- "Is any external party or formal process involved in this case?"

External reference number `[externalReference]`

Input: text | Section: Actions

Field prompt: Police CAD, HR case, insurer claim, courier claim, contractor ticket...

Capture: Record the linked external reference if one exists.

Script questions

- "What external reference number or case number is linked to that involvement?"

Corrections made / agreed `[correctionsMade]`

Input: textarea | Section: Actions

Field prompt: What was corrected on site or agreed with the store team?

Capture: Capture the corrective action or agreement made with the store.

Script questions

- "What correction or process fix was completed or agreed on site?"

Stock loss / counts

Reviewed stock-loss patterns, adjustments, counts, or shrink concerns.

Template key	`reviewed_stock_loss_or_counts`
Form variant	structured
Evidence label	Stock-loss evidence
Specialist	No
Detail placeholder	Explain the stock-loss issue reviewed, count findings, and what was escalated.

What Checked

Stock Loss Review Script

Use this while walking the shrink concern, count source, and stock area in scope.

- "What stock area, category, or SKU group are we reviewing?"
- "What shrink trend, adjustment issue, or count concern triggered the review?"
- "What count source, report, or system position are we comparing against?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Stock area / category reviewed `[stockAreaReviewed]`

Input: textarea | Section: What Checked

Field prompt: What stock line, area, or category was reviewed?

Capture: Record the stock area or category in scope.

Script questions

- "Which stock area, category, or SKU group was reviewed?"

Loss issue reviewed `[lossIssueReviewed]`

Input: textarea | Section: What Checked

Field prompt: Explain the shrink trend, adjustment issue, or count concern.

Capture: Describe the stock-loss issue that triggered the review.

Script questions

- "What stock-loss trend, adjustment issue, or shrink concern are we looking at?"

Count source / system used `[countSourceUsed]`

Input: text | Section: What Checked

Field prompt: Stock system, count sheet, adjustment report, delivery variance report...

Capture: List the source used to compare the stock position.

Script questions

- "What count source, report, or system position are we using?"

Findings

Stock Loss Findings Script

Use this section to pin down the main variance and whether there is a repeat pattern.

- "What did the count or stock review actually show?"
- "Is there a repeat SKU, shift, delivery, or handling pattern?"
- "What control weakness or root cause sits behind the stock loss?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Count findings `[countFindings]`

Input: textarea | Section: Findings

Field prompt: Record the main variances or count findings.

Capture: Summarise the main variance or stock finding identified.

Script questions

- "What did the count or stock review actually show?"

Trend / repeat pattern `[trendOrPattern]`

Input: textarea | Section: Findings

Field prompt: Repeat SKU loss, ongoing discrepancy, same shift, same delivery pattern...

Capture: Record any trend or repeat pattern linked to the stock-loss concern.

Script questions

- "Is there a repeat SKU, shift, or delivery pattern behind the issue?"

Actions

Stock Loss Action Script

Use this before closing so escalations, recounts, and ownership are explicit.

- "What was recounted, corrected, secured, or escalated after the review?"
- "Who was informed about the stock loss finding?"
- "Who owns the next step and by when?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Action / escalation `[actionEscalated]`

Input: textarea | Section: Actions

Field prompt: What was actioned or escalated after the review?

Capture: Capture the action or escalation raised from the review.

Script questions

- "What was actioned or escalated after the stock review?"

Delivery / parcel issue

Investigated delivery discrepancies, tampered parcels, or missing stock on receipt.

Template key	`checked_delivery_or_parcel_issue`
Form variant	structured
Evidence label	Delivery evidence
Specialist	No
Detail placeholder	Add the delivery issue reviewed, affected stock, and any evidence or follow-up.

What Checked

Delivery / Parcel Issue Script

Use this while recording the shipment, carrier, and problem found on receipt.

- "Which delivery, parcel, or transfer are we reviewing?"
- "What exactly was wrong with the shipment when it was checked?"
- "Which carrier, supplier, or sending location is linked to the issue?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Delivery reference `[deliveryReference]`

Input: text | Section: What Checked

Field prompt: Delivery note, carrier reference, parcel ID...

Capture: Enter the delivery note, carrier, or parcel reference.

Script questions

- "Which delivery, parcel, or transfer reference are we reviewing?"

Issue reviewed `[issueReviewed]`

Input: textarea | Section: What Checked

Field prompt: What was wrong with the delivery or parcel?

Capture: Describe the delivery, tamper, or shortage issue identified.

Script questions

- "What exactly was wrong with the delivery or parcel?"

Carrier / supplier `[carrierOrSupplier]`

Input: text | Section: What Checked

Field prompt: Courier, supplier, depot, store transfer source...

Capture: Record the courier, supplier, or transfer source involved.

Script questions

- "Which carrier, supplier, or source location is linked to the issue?"

Findings

Delivery Findings Script

Use this section to capture the affected stock and the evidence of tamper or shortage.

- "Which items were missing, damaged, or otherwise affected?"
- "What did the seal, carton, or packaging condition show?"
- "What loss value or control weakness does the delivery issue create?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Affected items `[affectedItems]`

Input: textarea | Section: Findings

Field prompt: List the missing, damaged, or tampered stock.

Capture: List the stock impacted by the delivery issue.

Script questions

- "Which items were missing, damaged, or affected?"

Seal / packaging condition `[sealOrPackagingCondition]`

Input: textarea | Section: Findings

Field prompt: Broken seal, re-taped parcel, damaged packaging, count mismatch, empty carton...

Capture: Capture the packaging condition and any signs of tamper or mishandling.

Script questions

- "What did the seal, carton, or packaging condition show?"

Actions

Delivery Action Script

Use this to record quarantine, notification, and claim ownership.

- "What was done with the affected stock or parcel on site?"
- "Who was notified or escalated to about the issue?"
- "Was a claim, incident, or supplier case raised and who owns it?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Evidence retained `[evidenceRetained]`

Input: textarea | Section: Actions

Field prompt: What evidence was retained, preserved, exported, or requested?

Capture: Record the evidence that was formally retained or preserved.

Script questions

- "What evidence was retained, preserved, exported, or requested as part of this activity?"

Where evidence is stored `[evidenceStoredAt]`

Input: text | Section: Actions

Field prompt: Shared drive, case folder, system, locker, safe, email chain, police portal...

Capture: State where the evidence is stored so it can be located later.

Script questions

- "Where is the retained evidence now stored?"

Who holds evidence now `[evidenceHeldBy]`

Input: text | Section: Actions

Field prompt: LP officer, store manager, HR, police, courier claims team...

Capture: Name the person or team currently holding the evidence.

Script questions

- "Who currently holds or controls that evidence?"

External involvement `[externalInvolvement]`

Input: text | Section: Actions

Field prompt: Police, HR, insurer, courier claim, supplier claim, contractor ticket, none...

Capture: Record any external party or formal process now involved.

Script questions

- "Is any external party or formal process involved in this case?"

External reference number `[externalReference]`

Input: text | Section: Actions

Field prompt: Police CAD, HR case, insurer claim, courier claim, contractor ticket...

Capture: Record the linked external reference if one exists.

Script questions

- "What external reference number or case number is linked to that involvement?"

Action taken `[actionsTaken]`

Input: textarea | Section: Actions

Field prompt: What was done on site or who was notified?

Capture: Record the action taken, such as quarantine, notification, or evidence capture.

Script questions

- "What was done with the parcel or stock on site?"

Claim / escalation reference `[claimOrCaseReference]`

Input: text | Section: Actions

Field prompt: Claim ID, incident ref, supplier escalation ref...

Capture: Enter the claim, incident, or escalation reference if one exists.

Script questions

- "Was a claim, incident, or supplier case reference raised?"

Security procedure review

Reviewed search procedures, guard deployment, key controls, or opening / closing security.

Template key	`reviewed_security_procedures`
Form variant	structured
Evidence label	Security-procedure evidence
Specialist	No
Detail placeholder	Capture which procedures were checked, any weaknesses found, and actions agreed.

What Checked

Security Procedure Review Script

Use this while testing procedures, key control, and guarding arrangements.

- "Which security procedures or routines are we checking?"
- "Which areas or stages of the process are covered by the review?"
- "Who was present while the procedure was tested or demonstrated?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Procedures checked `[proceduresChecked]`

Input: textarea | Section: What Checked

Field prompt: Search policy, key control, guard deployment, opening / closing...

Capture: List the procedures, controls, or routines tested.

Script questions

- "Which security procedures or routines were reviewed?"

Areas / process stages covered `[areasCovered]`

Input: textarea | Section: What Checked

Field prompt: Entrance, till area, stockroom, back door, key safe, opening, closing...

Capture: Record the physical areas or process stages included.

Script questions

- "Which areas or process stages were covered in the review?"

Guard / keyholder presence `[guardOrKeyholderPresent]`

Input: text | Section: What Checked

Field prompt: Who was present while the procedure was reviewed?

Capture: List the guard, keyholder, or manager present for the review.

Script questions

- "Who was present while the procedure was reviewed or demonstrated?"

Findings

Security Procedure Findings Script

Use this section to describe the breach, exposure, or control weakness found.

- "What step was missed or applied weakly?"
- "What breach, uncontrolled access, or exposure does that create?"
- "What weakness in training, guarding, or supervision explains it?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Weaknesses found `[weaknessesFound]`

Input: textarea | Section: Findings

Field prompt: Record any missed steps or security weaknesses found.

Capture: Summarise the main security weakness identified.

Script questions

- "What missed steps or security weaknesses were found?"

Breach / exposure identified `[breachOrExposure]`

Input: textarea | Section: Findings

Field prompt: Key control gap, search not completed, open access, poor guarding, uncontrolled entry...

Capture: Describe the security exposure or breach created by the issue.

Script questions

- "What breach, uncontrolled access, or exposure does the weakness create?"

Actions

Security Procedure Action Script

Use this to capture the immediate change, coaching, or escalation agreed.

- "What was changed or reinforced immediately?"
- "Who was updated or escalated to about the security weakness?"
- "Who owns the remaining action and by when?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Evidence retained `[evidenceRetained]`

Input: textarea | Section: Actions

Field prompt: What evidence was retained, preserved, exported, or requested?

Capture: Record the evidence that was formally retained or preserved.

Script questions

- "What evidence was retained, preserved, exported, or requested as part of this activity?"

Where evidence is stored `[evidenceStoredAt]`

Input: text | Section: Actions

Field prompt: Shared drive, case folder, system, locker, safe, email chain, police portal...

Capture: State where the evidence is stored so it can be located later.

Script questions

- "Where is the retained evidence now stored?"

Who holds evidence now `[evidenceHeldBy]`

Input: text | Section: Actions

Field prompt: LP officer, store manager, HR, police, courier claims team...

Capture: Name the person or team currently holding the evidence.

Script questions

- "Who currently holds or controls that evidence?"

External involvement `[externalInvolvement]`

Input: text | Section: Actions

Field prompt: Police, HR, insurer, courier claim, supplier claim, contractor ticket, none...

Capture: Record any external party or formal process now involved.

Script questions

- "Is any external party or formal process involved in this case?"

External reference number `[externalReference]`

Input: text | Section: Actions

Field prompt: Police CAD, HR case, insurer claim, courier claim, contractor ticket...

Capture: Record the linked external reference if one exists.

Script questions

- "What external reference number or case number is linked to that involvement?"

Action agreed `[actionsAgreed]`

Input: textarea | Section: Actions

Field prompt: Training, escalation, or immediate changes agreed with the store.

Capture: Record the security action agreed with the team.

Script questions

- "What change, coaching, or escalation was agreed?"

Store support / training

Coached the team or management on LP controls, standards, or immediate actions.

Template key	`provided_store_support_or_training`
Form variant	structured
Evidence label	Training evidence
Specialist	No
Detail placeholder	Describe the support or training given and who it was delivered to.

What Checked

Store Support / Training Script

Use this while documenting the coaching session and why it was needed.

- "What LP topic, control, or process are we covering today?"
- "Who received the support or training?"
- "What incident, audit gap, or performance concern led to this session?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Topic covered `[topicCovered]`

Input: text | Section: What Checked

Field prompt: What control, process, or LP topic was covered?

Capture: Record the subject of the coaching or training.

Script questions

- "What LP topic, control, or process was covered?"

Delivered to `[deliveredTo]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, whole team...

Capture: List the people or team who received the guidance.

Script questions

- "Who received the support or training?"

Reason for support / training `[trainingReason]`

Input: textarea | Section: What Checked

Field prompt: What concern, incident, audit gap, or request drove the coaching session?

Capture: Explain why the coaching or support was needed.

Script questions

- "What concern, incident, or audit gap drove this support session?"

Findings

Training Needs Script

Use this section to capture the knowledge or behaviour gap that was observed.

- "What did the team not understand, apply, or complete consistently?"
- "What loss risk did that gap create?"
- "What root cause sits behind the gap: knowledge, confidence, supervision, or process?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

Observed knowledge / behaviour gap `[observedKnowledgeGap]`

Input: textarea | Section: Findings

Field prompt: What did the team not understand or apply consistently before the coaching?

Capture: Describe the gap or weakness that prompted the training content.

Script questions

- "What knowledge, behaviour, or process gap did you observe?"

Actions

Training Delivery Script

Use this to record what guidance was given and how follow-up will be checked.

- "What practical guidance, coaching, or demonstration was given?"
- "Who was updated about the support provided?"
- "What follow-up, revisit, or manager action is still needed?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"

Guidance given `[guidanceGiven]`

Input: textarea | Section: Actions

Field prompt: Describe the coaching or support delivered on site.

Capture: Summarise the support or coaching delivered on site.

Script questions

- "What practical guidance or demonstration did you give?"

Follow-up needed `[followUpNeeded]`

Input: textarea | Section: Actions

Field prompt: Any return visit, manager action, or further training needed.

Capture: Record any follow-up support or checks still required.

Script questions

- "What further training, revisit, or manager action is still needed?"

Other

Capture any other on-site LP activity not covered above.

Template key	`other`
Form variant	structured
Evidence label	Supporting evidence
Specialist	No
Detail placeholder	Describe the additional work completed on site.

What Checked

Other LP Activity Script

Use this when the work does not fit a standard template but still needs a clear LP record.

- "What activity was completed and why was it necessary?"
- "Who was involved and what evidence or records were used?"
- "What exactly did you do on site?"

Incident / visit reference `[activityReference]`

Input: text | Section: What Checked

Field prompt: Incident number, visit ref, case ref, claim ref, or other tracking reference...

Capture: Record the main reference that should be used to trace this activity later.

Helper: Required core field for every activity.

Script questions

- "What is the main incident, visit, case, or claim reference for this activity?"

Exact date / time window in scope `[timeWindowInScope]`

Input: text | Section: What Checked

Field prompt: Exact date, shift, clip time, transaction window, delivery slot, or period reviewed...

Capture: Record the precise operational window in scope for this activity, even though the visit itself already has a visit date/time.

Helper: Required core field for every activity.

Script questions

- "What exact date, time window, shift, or review period does this activity cover?"

Exact store area `[storeArea]`

Input: text | Section: What Checked

Field prompt: Till area, stockroom, entrance, fragrance wall, cabinet, office, delivery bay...

Capture: Name the specific store area or operational point that was checked.

Helper: Required core field for every activity.

Script questions

- "Which exact store area, location, fixture, or control point does this activity relate to?"

Evidence reference `[evidenceReference]`

Input: text | Section: What Checked

Field prompt: Uploaded file name, case ref, clip ref, claim ref, ticket ref, or external evidence reference...

Capture: Record the evidence reference that ties this activity back to uploaded or external evidence.

Helper: Required core field for every activity.

Script questions

- "What evidence reference links this activity to uploaded files, footage, documents, or external records?"

LP objective / trigger `[lpObjective]`

Input: textarea | Section: What Checked

Field prompt: What incident, action, trend, audit gap, complaint, or intelligence triggered this report?

Capture: Record the incident, trend, request, complaint, or control gap that triggered the activity.

Script questions

- "What brought you to site today, and what LP concern or trigger are you working on?"

People present / involved `[peoplePresent]`

Input: text | Section: What Checked

Field prompt: Manager, keyholder, sales advisor, guard, courier, witness, contractor...

Capture: List the key people present, spoken to, or directly involved in the activity.

Script questions

- "Who was involved in this work, who did you review it with, and who needs to be named?"

Records / evidence reviewed `[recordsReviewed]`

Input: textarea | Section: What Checked

Field prompt: CCTV, paperwork, till reports, stock files, statements, delivery notes, alarm logs...

Capture: Capture the evidence and records checked so the report shows what the review was based on.

Script questions

- "What records, systems, footage, paperwork, or evidence did you review while doing this work?"

Activity type `[activityType]`

Input: text | Section: What Checked

Field prompt: What kind of LP work was completed that is not covered by the standard templates?

Capture: Name the activity clearly so the record is easy to understand later.

Script questions

- "What type of LP activity was completed?"

Details `[details]`

Input: textarea | Section: What Checked

Field prompt: Describe the additional work completed on site.

Capture: Describe the activity in practical terms, including what was checked or done.

Script questions

- "Talk me through exactly what work was completed on site."

Findings

Other Activity Findings Script

Use this section to capture the risk, issue, or weakness that came out of the activity.

- "What LP risk or operational weakness was identified?"
- "What loss exposure or concern does it create?"
- "What appears to be the root cause?"

Confidence / case status `[caseConfidence]`

Input: select | Section: Findings

Field prompt: Select confidence level

Capture: Choose the confidence level that best reflects the evidence position without overstating it.

Helper: Required core field for every activity.

Script questions

- "Based on the evidence reviewed, is this confirmed, probable, suspected, ruled out, or not substantiated?"

Loss / value impact `[lossValueImpact]`

Input: text | Section: Findings

Field prompt: Known shortage, units missing, cash discrepancy, value at risk, or potential exposure.

Capture: Record the confirmed or suspected loss value, stock units, cash variance, or exposure.

Script questions

- "What loss, shortage, value at risk, or exposure was identified or ruled out?"

Root cause / control weakness `[rootCauseOrWeakness]`

Input: textarea | Section: Findings

Field prompt: What control or process weakness allowed the issue to happen or continue?

Capture: Summarise the root cause, missed control, or weakness that allowed the issue to happen or continue.

Script questions

- "What control gap, behaviour, or process weakness appears to explain the issue?"

LP risk / issue captured `[lpRiskObserved]`

Input: textarea | Section: Findings

Field prompt: What loss risk, concern, or operational weakness was captured during this activity?

Capture: Summarise the key risk or concern identified through the activity.

Script questions

- "What LP risk, issue, or weakness came out of this work?"

Actions

Other Activity Action Script

Use this to close the activity with a clear action and owner.

- "What did you correct, escalate, or complete before leaving site?"
- "Who was updated about the issue?"
- "What next step remains and who owns it?"

Outcome status `[outcomeStatus]`

Input: select | Section: Actions

Field prompt: Select outcome status

Capture: Choose the operational outcome that best describes how this activity closed or escalated.

Helper: Required core field for every activity.

Script questions

- "What is the overall outcome of this activity right now?"

Follow-up owner `[followUpOwner]`

Input: text | Section: Actions

Field prompt: Name the person or team who owns the next step...

Capture: Record the named owner for the next step.

Helper: Required core field for every activity.

Script questions

- "Who owns the next action after this visit or report?"

Follow-up deadline `[followUpDeadline]`

Input: date | Section: Actions

Field prompt: Select follow-up deadline

Capture: Record the target date for follow-up completion.

Helper: Required core field for every activity.

Script questions

- "What is the deadline for that follow-up action?"

Follow-up status `[followUpStatus]`

Input: select | Section: Actions

Field prompt: Select follow-up status

Capture: Choose the current status of the follow-up action.

Helper: Required core field for every activity.

Script questions

- "What is the current status of the follow-up work?"

Follow-up completed date `[followUpCompletedAt]`

Input: date | Section: Actions

Field prompt: Select completion date

Capture: Record the completion date when the follow-up has been closed out.

Helper: Complete this when the follow-up has actually been finished.

Script questions

- "If the follow-up is complete, on what date was it completed?"

Immediate containment completed `[immediateContainment]`

Input: textarea | Section: Actions

Field prompt: What was secured, removed, corrected, coached, or contained before leaving site?

Capture: Record the immediate containment or corrective action completed before the visit ended.

Script questions

- "What did you secure, correct, contain, or coach before leaving site?"

Escalated to `[escalatedTo]`

Input: text | Section: Actions

Field prompt: Manager, area manager, finance, investigations, HR, security provider, police...

Capture: List the people or teams the issue was escalated or handed over to.

Script questions

- "Who was updated or escalated to after this work was completed?"
